# SPORCE PROPERTY OF THE PROPERT

## AEROSOL RESOURCES AVAILABLE TO SUPPORT YOU!

Want more information? Email: Jeanine at jvecchio@EmpireEMCO.com

#### **Market Segments**

Personal Care | Health & Beauty | Household Goods | Automotive Care | Outdoor & Marine Computer Care & Electronics | Shoe & Leather Care | Industrial Products | Specialty Products

<u>MYTH:</u> Aerosols are not environmentally friendly.

REALITY: That is NOT true. All consumer and most other aerosol products made or sold in the U.S. now use propellants—such as hydrocarbons and compressed gases like nitrous oxide—that do NOT deplete the ozone layer.

### **TECHNOLOGY** — WHAT IS BOV?

Bag-on-Valve ('BOV') is a dispensing technology that is superior to conventional aerosol dispensing from the standpoint of safety, practicality and environmental impact (\*not compatible with all products)

#### BOV sprays provide:

- ♦ Non Flammable/Non Explosive (depending on formula)
- ♦ Continuous spray
- Even and controlled spraying
- No chemical propellants—uses only the power of air
- ♦ Longer shelf life
- ♦ 360 degree spray
- **♦ Zero Carbon Footprint**
